

## **Federal Reserve Bank Malware Spam**

Perimeter eSecurity would like to notify customers of e-mail malware/spam threat pertaining to the Federal Reserve Bank. The e-mail spam contains links that bring the user to a malicious site or could allow malware to be downloaded to a victim's computer.

Perimeter has intercepted and blocked these malware messages in our content/spam filters. The e-mail messages vary on topic from requesting users to verify their banking information to the 2009 tax return status. If a user clicks on the link within the e-mail spam, the user will be brought to either a website where malware is downloaded without user knowledge, or to a site where sensitive information could be disclosed. The e-mail spam messages that have been intercepted contained the following URLs:

federalreserve.banknetworks.net  
federalreserve.usbanknet.net  
frb.ebanknetworks.net  
frb.usbanknet.us
